# Decades of Service Means More Practical Expertise.

More than 90 years of direct experience in the field—especially with independent commercial banks— provides the familiarity and practical understanding of audit, tax, and consulting services that can make Henry & Peters a trusted partner in your success.

## Established in Oil & Gas

Our expertise has been built on practical understanding gained from decades of serving exploration and service companies, working closely with their investors and owners.

There have been dramatic changes the past 90 years – for East Texas and Henry & Peters, as well as for the oil and gas industry as a whole – but our firm has remained dedicated to the industry and its companies. This business has been key to the economic success of this region, and Henry & Peters would not be what it is today without the opportunities the oil and gas industry has provided.

Henry & Peters serves clients across Texas and the US. Our oil and gas clients come from throughout the industry – upstream, midstream, downstream – and we employ more than 130 employees to serve them, a roster built on professional degrees and practical experience. Many began their careers with national accounting firms but developed “real expertise” working together with the exceptional clients at Henry & Peters.
